# APD-RSA-4018-6.5'-4.0" DIA .188"

Round Straight Aluminum Pole

## **Physical Data**

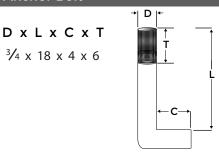

Pole Height: 6.5' Pole Diameter: 4"

Thickness: 0.188" Weight: 21 lbs

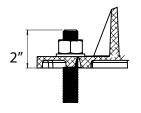

## **Anchor Bolt**

4.65"

## **Bolt Projection**

### **Die-Cast Base Cover**

## **Maximum EPA**

MPH	90	100	110	120	130
EPA	7.7	6.6	5.8	5.0	4.4

THERE IS AN ADDITIONAL COST FOR THESE FINISHES	INSPIRED BY NATURE FINISHES  SW01 - OAK FINISH  SW02 - WALNUT FINISH  SW03- PINE FINISH  DF - DOUGLAS FIR FINISH  CW - CHERRY WOOD FINISH  NW - NATIONAL WALNUT FINISH  SU01 - CONCRETE FINISH  SU02 - SOFTSCAPE FINISH  SU03 - STONE FINISH  SU04 - CORTEN FINISH	LS Leveling Shim  Single Banner Arm  Double Banner Arm  Banner arms are designed with a safety break-away at the clamp with an internal safety wire that prevents the arm from falling to the ground.  It is important to calculate the additional EPA loading on the pole based on the size and quantity of banners.  Adding banners will affect the EPA of the pole and should be taken into consideration before installing.  Incorrect pole loading of any type voids pole warranty.				
Inspired by Nature Finishes  The Inspired by nature Finishing is a unique system of decorative powder coating. Our metal decoration process can easily complete therein print and then transferred into a customized complete the process of metal por admiration and the print and then transferred into a customized complete the process of metal por admiration and the print and the print and then transferred into a customized complete the print and the						

wood grain finish.

This patented technology enables the simulation of wood grain, and even marble or granite finish through the use of decorative powder coating.

The wood grain finish is so realistic that it's almost undistinguishable from real wood, even from a close visual inspection. The system of coating permeates the entire thickness of the coat and as a result, the coating cannot be removed by normal rubbing, chipping, or scratching.

The Coating Process
After pre-treatment the prepared parts are powder coated with a specially formulated polyurethane powder. This powder provides protection against wear, abrasion, impact and corrosion and acts as the relief base color for the finalized metal decoration.

The component is then wrapped with a sheet of non-porous film with the selected decoration pattern printed on it using special high temperature inks.

over. The over it anisoms the link flow line that film is removed, and a vivid timber look on aluminum remains.

Wood grain coating can create beautiful wood-looking products of any sort. There are over 300 combinations of designs currently in use. Wood grains can be made with different colors, designs, etc.

Our powder coatings are certified for indoor and outdoor applications and are backed by a comprehensive warranty. These coatings rise to the highest conceivable standard of performance excellence and design innovation.

- Added Benefits
   Resistance to salt-acid room, accelerated aging
- Boiling water, lime and condensed water resistant
   Anti-Graffiti, Anti-Slip, Anti-Microbial, Anti-Scratch
   Super durable (UV resistant)
   TGIC free (non-toxic)

## INSTALLATION AND SERVICE MANUAL

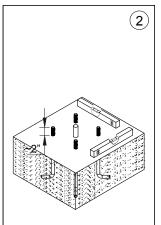

### Anchor Bolt Installation for Poles

# What's Included Per Pole x 4 0 0 0 0 A single anchor bolt template is provided per pole size to be used for the poles on the project. Anchor bolt template may be round or square dependant upon which pole is being used.

Use anchor bolt template to set anchor bolts into concrete as per civil engineering instructions.

Ensure that the concrete is plumb using a level. Failing to do this will result in pole being uneven or tilted.

Ligman does not provide foundation details A local engineer that is familiar with the site soil conditions should provide this information.

### NOTE:

Ligman does not recommend using leveling bolts for pole installations.

Leveling shims can be provided, contact Ligman for more information.

After establishing a level platform the space between the original concrete surface and the pole base should be filled with concrete and finished flush.

**Preferred Pole Installation** Note: Bolt cover stops flush 4.65 with the pole base plate A level concrete base is poured and finished flush. This provides a uniform load displacement pad for the forces created by wind and Failing to do this voids pole warranty Foundation and Design by Others

In rare instances where leveling bolts have to be used, it is important that a flush concrete surface is created to mount the pole base plate. NOTE: When using leveling bolts, bolt projection

should be 3.5" **Using Leveling Bolts** Option A Note: Bolt cover stops flush with the pole base plate Concrete pad to be provided by ontractor after leveling pole

> Slot to be provided in concrete to allow water to drain

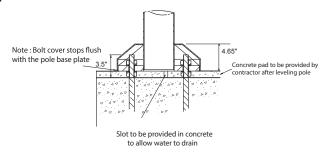

When using leveling bolts.

After establishing a level platform the space between the original concrete surface and the pole base should be filled with concrete and finished flush.

This provides a uniform load displacement pad for the forces created by wind and luminaire weight

Foundation and Design by Others

### **Using Leveling Bolts** Option B

When using leveling bolts.

This provides a uniform load displacement pad for the forces created by wind and luminaire weight
