## Steamer Large Round Surface

### Construction

**Aluminum**  
Less than 0.1% copper content – Marine Grade 6060 extruded & LM6 Aluminum High Pressure die casting provides excellent mechanical strength, clean detailed product lines and excellent heat dissipation.

**Pre paint**  
8 step degrease and phosphate process that includes deoxidizing and etching as well as a zinc and nickel phosphate process before product painting.

**Memory Retentive -Silicon Gasket**  
Provided with special injection molded "fit for purpose" long life high temperature memory retentive silicon gaskets. Maintains the gaskets exact profile and seal over years of use and compression.

**Thermal management**  
LM6 Aluminum is used for its excellent mechanical strength and thermal dissipation properties in low and high ambient temperatures. The superior thermal heat sink design by Ligman used in conjunction with the driver, controls thermals below critical temperature range to ensure maximum luminous flux output, as well as providing long LED service life and ensuring less than 10% lumen depreciation at 50,000 hours.

**Surge Suppression**  
Standard 10kv surge suppressor provided with all fixtures.

**BUG Rating**  
B2 - U0 - G2

**Finishing**  
All Ligman products go through an extensive finishing process that includes fettling to improve paint adherence.

**Paint**  
UV Stabilized 4.9Mil thick powder coat paint and baked at 200 Deg C. This process ensures that Ligman products can withstand harsh environments. Rated for use in natatoriums.

### MicroPRIM Finishes

MicroPRIM is Ligman's trade marked decorative powder coating technology that permanently infuses colors, patterns, or imagery directly into the surface of luminaires and poles while providing protections that standard powder coating does not offer.

MicroPRIM finishes include nature-inspired wood grains and stone aesthetics, material-inspired finishes such as brushed metal, concrete, and carbon fiber, Solid colors in Ligman standard colors, as well as any RAL or Pantone color, Decorative patterns, custom imagery and more.

### Coating and Infusion Process

Metal components are pre-treated and powder coated with a proprietary polyurethane-based coating engineered for outdoor architectural use. Decorative patterns or imagery are then permanently infused into the cured powder coat through a heat-based process, creating a durable, integrated finish.

### Performance and Validation

MicroPRIM finishes are suitable for indoor and outdoor applications and meet AAMA2605 architectural coating requirements. Performance is validated through laboratory and real-world testing to ASTM standards for UV exposure, adhesion, abrasion, impact, salt spray, chemical resistance, and graffiti resistance.

All MicroPRIM finishes are backed by Ligman's 10-year warranty.

**Key Performance Attributes**  
•Anti-graffiti resistance  
•UV and weather resistance  
•Scratch and abrasion resistance  
•Natatorium Rated for installation in corrosive environments

**Hardware**  
Provided Hardware is Marine grade 316 Stainless steel.

**Anti Seize Screw Holes**  
Tapped holes are infused with a special anti seize compound designed to prevent seizure of threaded connections, due to electrolysis from heat, corrosive atmospheres and moisture.

**Crystal Clear Low Iron Glass Lens**  
Provided with tempered, impact resistant crystal clear low iron glass ensuring no green glass tint.

**Optics & LED**  
Precise optic design provides exceptional light control and precise distribution of light.  
LED CRI > 80

**Lumen - Maintenance Life**  
L80 /B10 at 50,000 hours (This means that at least 90% of the LED still achieve 80% of their original flux)

## Surface wall-mounted contemporary area lighting family. Modern and powerful high-end, optimum-quality area lighting projectors.

A slim, wedge-shaped, high-pressure die-cast pole-mounted area light designed with a full range of distributions to meet the needs of lighting designers in various applications. This luminaire provides outstanding performance through highly efficient LED packages paired with precision-engineered optics, delivering excellent spacing-to-mounting-height ratios and uniform illumination that meets code requirements while reducing energy consumption.

The Steamer can be configured with asymmetrical Type II, III, IV, and ME optical distributions—including customized variations for projects requiring highly specific light patterns. For example, Type II and Type IV optics can be combined within the same fixture to achieve unique distribution requirements.

Type V distributions are also available in narrow, medium, wide, very wide, and extra-wide options; please contact the factory for additional details.

This luminaire meets dark-sky requirements when installed in a level, horizontal orientation. It is ideal for illuminating private roadways, parking areas, exhibition sites, service stations, and truck stops. Optional internal house-side shields are available to further control backlight.

A range of integral electronic and dimmable drivers is offered, along with options for occupancy sensors and wireless lighting controls compatible with building management platforms. (Customer to Specify System)

The fixture features a programmable driver (WATT-ADJUST), allowing factory-set wattage configurations tailored to project specifications.

To comply with International Dark Sky Association (IDA) guidelines, the luminaire must be equipped with 3000K (or warmer) LEDs and installed in a fixed horizontal position ( $\pm 15^\circ$  allowable for leveling).

*This fixture is designed for ASCE 7 Exposure Category B wind conditions. Contact Ligman for applications in higher-wind areas.*

### Additional Options (Consult Factory For Pricing)

A31291 Gantry Arm Wall Mount      BD Bird Deterrent Spikes

A90991 Zhaga Book 18      A90891 NEMA 7

209w LED 28,820 Lumens (For lower Wattages See Page 2)  
IP66 · Suitable For Wet Locations  
IK08 · Impact Resistant (Vandal Resistant)  
Weight 24.6 lbs

Mounting Detail

Ligman's micro Variable Optical System provides the ability to interchange, mix & rotate optics to provide specific light distributions for optimized spacing and uniformity.

The variable optic system allows for the designer to create hybrid distributions for precise lighting requirements.

### ADDITIONAL OPTIONS

### CITY OF FLAGSTAFF & TURTLE FRIENDLY COMPLIANT

- NAT - Natatorium Rated
- DIM - 0-10v Dimming
- OS - Occupancy Sensor
- A31291 - Gantry Arm Wall Mount

- BD - Bird Deterrent Spikes
- A90991 - Zhaga Book 18
- A90891 - NEMA 7

**Narrow-Spectrum Amber LEDs**  
Peak wavelength between 585 & 595 nanometers and a full width of 50% power no greater than 15 nanometers.

### More Custom Finishes Available Upon Request
